SOFTWARE BY FUNCTIONALITY

ACCOUNTING/ERP

Your accounting or Enterprise Resource Management (ERP) software is at the center of your organization's financial health. General Ledger, Accounts Receivable, and Accounts Payable, along with a host of other critical business information, should be as accurate as possible. You want a financial management system that meets the needs of your organization now and can also be scaled for your growth.

**Microsoft Dynamics GP • Microsoft Dynamics SL • Sage Intacct
Microsoft Dynamics 365 Business Central**

BUDGETING & FORECASTING

Budgeting and forecasting software can move an organization from manual, error-prone spreadsheets and processes to more reliable and accurate methods, reducing the potential for fatal errors. These applications use your organization's financial data to help predict business expectations, forecast expenses, analyze budgetary information, and predict trends, along with a multitude of other data points important to the success and long-term growth of your organization.

Full Circle Budget • Solver BI360 • Adaptive Insights

MEMBER/DONOR MANAGEMENT

Built on the Microsoft Dynamics CRM platform, MemberCast features a built-in member/donor portal and back-office integration capability. The Microsoft Dynamics 365 (CRM) platform is more than just a database as it features a powerful suite of sales, marketing, and service capabilities that help you better understand, track, and deliver what your members and constituents really want.

MemberCast built on Dynamics 365 (CRM) • Microsoft Dynamics 365 (CRM)

FINANCIAL REPORTING & DASHBOARDS

As experts in the nonprofit field, we know what nonprofits need to report on when preparing financials for your board members. All financial reporting software we support integrates with your accounting software and with Microsoft Excel.
